SAFETY TP Information from Ready.gov and Martinez Area CERT

Build a Car Kit

Being on the road when disaster strikes can put you in a challenging situation. In addition to maintaining your vehicle is good order, prepare for the unexpected with a well stocked Car Emergency Kit. Store your supplies in a durable canvas bag. You will want to grab your Go Bag in an emergency for your personal items. Download information for Go Bags and Pet Go Bags at our <u>Resources page</u>.

- Get into the habit of filling your tank when it reaches half full.
- Check that your tires and spare are in good condition.
- Do not drive through flooded areas. Six inches of water can cause a car to lose control or possibly stall. A foot of water will float many cars.
- Pay attention to areas where floodwaters have receded. Roads may have weakened and could collapse under the weight of a car.
- If a power line falls on your car you are at risk of electrical shock. Stay inside until a trained person removes the wire.
- If it becomes hard to control the car, pull over, stop the car, turn on emergency flashers, and set the parking brake.
- Be aware. The emergency could affect the stability of the roadway, overpasses, bridges, power lines, signs and other hazards.
- Customize your kits for your personal needs, weather, and location.

Car Kit essentials

- o Multipurpose tool
- Flashlight and extra batteries
- Paper maps
- Emergency blanket
- \circ Car cell phone charger
- Visit ready.gov/car for more information.

- o Jumper cables
- Flares or reflective triangle
- o Ice scraper
- Cat litter or sand (for better tire traction)

For more preparedness information and free training opportunities, visit your Martinez Area Community Emergency Response Team (**CERT**) at <u>martinezcert.org</u>

Make it a habit to fill up when gas is $\frac{1}{2}$ full.

Keep a Car Kit in case you are stranded.
